

# Extraordinary Exception Tracking

## CASE STUDY

### MOD Company Saves \$1.6 Million through TravelAudit™'s Exception Tracker!

Headquartered in Houston, Texas and operating in more than 20 countries, MOD Company maintains and operates a diversified fleet of installation vessels, fabrication facilities, marine bases and engineering offices. Today MOD Company employs approximately 13,500 employees representing more than 50 nations with unique languages and dialects.

MOD Company selected TSI as their Global Travel Management Company in 2010 due to their global scope, ability to provide automation for crew and marine travel and their dynamic TravelAudit™ product. TSI consulted with MOD Company on the development of a global travel policy that would result in savings while not impacting their culture and the comfort of their travelers. These policies were programmed into TravelAudit™ and with our Exception Tracker module alone, we achieved savings of over \$1.6 Million by identifying and re-booking non-compliant bookings pre-trip!

TravelAudit™'s Exception Tracker will alert you when travelers book outside the corporate policy and notify you when there are lower prices available, giving you the option to re-book at the lower price before your trip is purchased.

"The system does all the work for you. We have saved a significant amount of money with minimal to no effort on our part! I am looking forward to seeing what our TravelAudit™ results are for 2014!"

Global Travel Manager,  
MOD Company

MOD COMPANY 2013 TRAVELAUDIT™ EXCEPTION TRACKER RESULTS	AIR	CAR	HOTEL	TOTAL
Total Pre-Trip Savings	\$1,532,746.96	\$19,357.36	\$24,473.40	<b>\$1,576,577.72</b>
